

PSF-CI10-GR Product Data Sheet

Item number: 60-035

General Information

Sulphate of Potash 50 (+45)
50 % K₂O, water-soluble potassium oxide (=41.5 % K)
45 % SO₃, water-soluble sulphur trioxide (=18 % S)

PSF-CI10-GR is a concentrated potassium and sulphur fertilizer perfectly suited to mechanized spreading and bulk blending as well as to straight manual application. It is particularly recommended to increase yield and quality of chloride sensitive crops e.g. vegetables and fruits, grapes and tobacco. Moreover **PSF-CI10-GR** is the preferred form of potassium for salt affected soils because it is virtually free of chloride and has a low salt index.

The product is made from crude potassium salt of natural origin and is permitted for use in organic farming according to the Regulations (EC) No 834 / 2007 and (EC) No 889 / 2008.

Chemical Analysis

Parameter	Unit	Typical value
Potassium Sulphate (K ₂ SO ₄)	%	93
Other Sulphates (MgSO ₄ , CaSO ₄)	%	3
Chlorides (KCl, NaCl)	%	1.4
Others, mainly Water of Crystallization	%	2.6

Granulometry

Parameter		Unit	Typical value
Tyler Mesh +5	> 4 mm	%	3
Tyler Mesh 9 – 5	2 – 4 mm	%	89
Tyler Mesh -9	< 2 mm	%	8
SGN		%	280

Storage

Parameter	Unit	Typical value
Bulk Density	kg / m ³	approx. 1,250
Bulk Density	lbs / ft ³	approx. 78
Bulk Density (packed)	kg / m ³	approx. 1,300
Bulk Density (packed)	lbs / ft ³	approx. 81
Angle of Repose	°	approx. 38

The product is to be kept dry and covered with a plastic tarpaulin to protect from moisture. Where bulk product is stored, steel joists and columns should be protected from corrosion, as well as the floor and the walls should be furnished with a protective coating. Wooden walls and roof girders have proved to be particularly durable.
